

## # Meeting Agenda

Group:21

Date:2018-10-12

Chair: Yazan Ghafir

Participants: All group members

### ## Objectives (5 min)

- Checking what have been done of the distributed assignments from last week.

### ## Reports (15 min) from previous meeting

- Carl: Worked on a Digital design model. Worked on RAD/SDD.
- Erik: Worked on the design model. Worked on SDD
- Yazan: Worked on RAD. Added user stories. Worked on modelling the code of Client project and added test structure.
- Mohamad: Worked on isolating logic from connection to send and receive classes (Modul the code to so that the code will be able to be tested) and added test structure.

### ## Discussion items (35 min)

- We need now to isolate the client model.
- We need to low the dependences to be able to test.

### ## Outcomes and assignments (5 min)

- Yazan and Mohamad will work on isolating the Client model code and modelling the Client project (lowing dependencies).
- Carl and Erik will work on isolating the Server model code and modelling the Client project (lowing dependencies).

### ## Wrap up
