28  ## Discussion items (35 min)
29  -Discussed how these meetings will work. We cant to continue having one meeting on
30  monday and one on friday. The
31  monday one has an objective to create assignments for the week and friday will
32  allow us to discuss the week that has been.
33
34  -Everyone needs to work more on RAD/SDD
35  -Discussed how to handle git. Considering we're 4 people, we need to push more
36  often. Pushing once a week doesn't
37  allow the other parts of the group so see what you've done and often can't continue
38  their own work.
39  -Went through what code we have access to in order to discuss wether we're breaking
40  any OOP-principles. Looks good so far.
41
42  ## Outcomes and assignments (5 min)

44  -Every member should be working on the RAD/SDD during next week.
45  -More concrete assignments regarding coding and so on will be done on monday.
