Meeting Agenda
Group:21
Date:2018-10-18
Chair: Carl Östling
Participants: All group members

Objectives (5 min)

- Go over what has been done and set new goals.

Reports (15 min) from previous meeting
- Erik has been writing tests and some SDD and worked on making the friendlist refresh correcrly.
- Yazan has been writing tests for ClientModel and has been working on removing dependencies. It's proven to be quite difficult. We have an issue where two controllers are used.
- Mohamad has been working on reducing the dependencies in Client. Specifically working on the services for IO and server-connections.
- Carl has been writing tests for the server, been working on reducing the dependencies in the server and fixed how refreshing the friendlist works. and updated the design-model.

Discussion items (35 min)
-Discussions about how the git-inspector will handle our code. Even though everybody is working, it doesn't feel fair how the gitinspector will grade our code.

Outcomes and assignments (5 min)
- Every member will continue working on the RAD/SDD.
- Yazan and Mohamad will work together on fixing the Client depencency structure.
- Carl and Erik will continue on perfecting the server structure.
-If we cannot find a good solution to this till next meeting, since were running out of time, we will look at other ways of improving the project.

Wrap up

Next meeting on Monday
