Meeting Agenda

Group: 21 Date: 2018-10-28 Chair: Erik Gunnarsson Participants: All members

Objectives (5 min)

- Discuss what is left to do this weekend in order to finalize the final report and all diagrams etc.

Reports (15 min) from previous meeting

- Carl has been working on code cleanup, the final report aswell as UML and sequence diagrams.
- Erik has implemented an observer pattern to remove the last circular dependency in the project. Alongside this he has been working on the final report document and STAN diagrams.
- Yazan has polished the GUI aswell as worked on the class diagram.
- Mohamad has finalized the voice messaging functionality for the project aswell as worked on the documents.

Discussion items (35 min)

- We still need to prepare the presentation for tuesday

Outcomes and assignments (5 min)

The general presentation layout:
- Yazan GUI
- Carl sockethandler and WAN
- Erik message class, generics, general demo
- Mohamad voice message demo, how files are sent

Some parts of the presentation will require everyones attention aswell as practice our parts
The presentation is on tuesday, we will have practice on monday afternoon.
